

## **SEMI: SEminars on Middle Ages and Information Technology**

**SEMI** is a joint initiative promoted by SISMEL and FEF to foster the scientific reflection on cross domain subjects and increase the cross fertilization between culture and technology.

**SEMI** support the debate and knowledge exchange among scholars and reserachers coming from different disciplines both traditional and digital.

**SEMI** will plan to organise peridic meetings and workshops to develop new ideas and bring new (digital) tools and solutions for the scholarly communtiy in the Humanities.

As a follow-up for each **SEMI** meeting a final position paper - prepared by the invited experts and reflecting the works - will be released and published on the **SEMI** website

The **SEMI** meeting will be streamed over the net and published in the website.

The **SEMI** meetings calendar will be published on the SISMEL and FEF websites.

Official **SEMI** languages are italian and english
